Detailed Action

This is the first Office Action corresponding to original count. The application contains 21 claims.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement, which has been reviewed by the Examiner.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 75, 88, 150 and 152. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: on page 5, line 4, "52" apparently should be - - 22 - -, and on page 7, paragraph 26, line 4, "an outer" should be - - the outer - -.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Lai et al. (Pat No 5,556,170).

The patent to Lai et al. shows a pedestal assembly capable of supporting a boat seat, comprising two pedestal members (33, 21) and a pneumatic cylinder (31) having an actuator (unnumbered, located at the top of the cylinder).

Allowable Subject Matter

Claims 1-9, 10, and 15-21 are allowed.

Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: a seat pedestal comprising a receiving member inside a cylinder member for receiving a mechanical fastener and a groove receiving said receiving member; or the use of the use of a cable activating the switch in combination with the invention recited in claim 11.

Conclusion

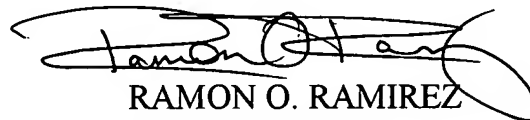

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bauner (5,462,248), Fuhrmann et al. (5,944,290), Metzdorf et al. (5,992,815), Jeon et al. (2002/0109052 A1), Yoon (2002/0162922 A1), Enders et al. (2004/0041063 A1) and Boaro et al. (2004/0108423 A1) show examples of pneumatic spring used as lifting means.
